AER-DEC® IN SLOANSTONE®

Form and function, perfectly integrated

This is more than a sink. It's a fully integrated handwashing system engineered for performance, easy cleaning, and design freedom. Whether you're specifying for healthcare, education, transportation, or office buildings, AER-DEC in SloanStone is the new standard. AER-DEC is now available at multiple price points—choose fabricated or pre-formed without compromising experience or design.

Touch-free convenience

Integrated sensor-operated faucet, soap dispenser, and hand dryer with a built-in air dam ensures a sanitary, splash-free experience.

Durability by design

SloanStone pre-formed solid surface decks are non-porous, resist impact, prevent grime buildup, are repairable, and withstand the demands of high-traffic environments.

Make it unique

Match any aesthetic with 25 sink deck color options, in 1-4 station trough styles, paired with BASYS®, Clark Street®, or Rush Street® fixtures in 5 distinct finishes.

Engineered for demanding spaces

With seamless construction, rounded corners, and vandal-resistant fixtures, the AER-DEC® in SloanStone® is purpose-built for busy public environments. Specify with confidence knowing it meets the hygiene, design, and budget demands of today's commercial spaces.

Ideal for the following environments

- | | |
|--|---|
|  Education |  Healthcare |
|  Transportation |  Office |
|  Entertainment |  Hospitality |
